

Quick-Step® Livyn stair profile Glue Inner corner

Finishing profile for stairs and steps

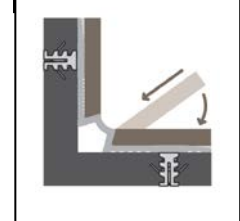

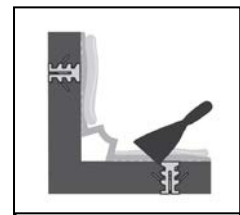

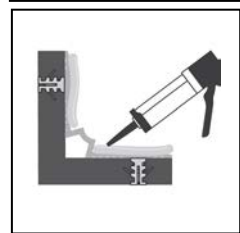

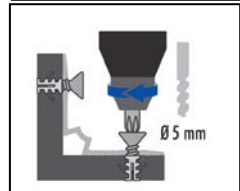

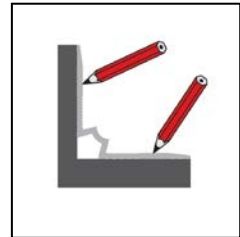

Product Specifications:

- Contents: 1 pre-drilled profile
- Dimensions: 200 x 2,5 x 2,5 cm
- Ordering code: QSVSTPINGLUE, order per 1 pc
- Very slim profile for use with **glued** Livyn floors.
- For use on stairs and steps.
- Wear-resistant quality aluminium, silver tone.
- Installation with screws and plugs (not included).
- Shape of the profile improves installation comfort: camouflages cutting lines in case they are not a 100% straight

Installation

- Use this profile on every inner corner of your stairs
- Make sure the step is clean, dust-free and level.
- Saw the profile to the correct length.
- The Quick-Step® stair profile has pre-drilled and countersunk drill holes. Mark the drill holes on the sub and side floor with a pen.
- Use screws with a diameter of 5 mm.
- **Installation on mineral subfloors:** Aluminium basic profiles should be firmly screwed into the surface.
- **Installation on wooden subfloors:** evaluate the need to use plugs (depends on the type of wood), alternatively screw directly into the wooden subfloor.
- Apply the Quickstep One4all glue over the basic profile and level out carefully. As well as on the upper side of the profile, again, level out carefully.
- Then place the livyn planks.

TIP:

- With the Quick-Step® Livyn tool and cutting knife you can precisely cut the Livyn plank to fit the inner corners of your staircase.
