

SMD30LR

30,000rpm Low Vibration Die Grinder

➤ Features & Benefits

- **Front vibration dampening system** - absorbs process and consumable vibration
- **New motor design** – improved power to weight ratio
- **Moulded body design** - improved aesthetics, ergonomics and insulation
- **Lightweight design** – results in improved operator comfort
- **Rear exhaust** – offers reduced noise

➤ Specification

- Power = 310w / 0.42hp
- Weight = 323g
- Dimensions L = 177mm D = 38mm

➤ Consumables

- Ideally suited to 6mm shank burs with head diameter ≤ 12 mm

➤ Applications

- A wide variety of applications where carbide burs are used. The vibration dampening system delivers a reduction in vibration.
