

# Bandsaw machine – BMSY 360 CGH

## Description

Horizontal band saw with linear guideways, ideal for mitre cuts between 90° and +30°. Auto height adjustment sensors ensure that the bow can approach the material at high speed. The hydraulic cutting control makes the bow rise up again after a cut has been made. This process is controlled by a digital counter on the control panel. The bow angle is shown in the digital display.

## Features

- inverter
- hydraulic vice
- 3° inclined blade
- mechanical height adjustment
- 1.2 m roller table
- hydromechanic blade tension
- pressure regulator
