

## PRESTATIEVERKLARING

### DoP 0259

voor fischer Zykon FZEA II (mechanisch anker voor gebruik in beton)

NL

1. Unieke identificatiecode van het producttype: DoP 0259
2. Beoogd(e) gebruik(en): Bevestigingen in gescheurd of ongescheurd beton, zie bijlage, met name de bijlagen B1 - B3.
3. Fabrikant: fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Duitsland
4. Gemachtigde: -
5. Het systeem of de systemen voor de beoordeling en verificatie van de prestatiebestendigheid: 1
6. Europees beoordelingsdocument: ETAG 001 Part 3, April 2013, gebruikt als EAD  
Europese technische beoordeling: ETA-06/0271; 2016-11-30  
Technische beoordelingsinstantie: DIBt- Deutsches Institut für Bautechnik  
Aangemelde instantie(s): 2873 TU Darmstadt
7. Aangegeven prestatie(s):  
**Mechanische weerstand en stabiliteit (BWR 1)**  
**Kenmerkende weerstand tegen spanningsbelasting (statische en quasi-statische belasting):**  
Weerstand tegen staalbreuk: Bijlage C1 E<sub>s</sub>= 210 000 MPa  
Weerstand tegen uittrekken: Bijlage C1  
Weerstand tegen betonnen kegelbreuk: Bijlage C1  
Robuustheid: Bijlage C1  
Minimale rand- en hartafstand: Bijlages B2, B3  
Randafstand om spleetbreuk onder belasting te voorkomen: Bijlage C1 N<sup>0</sup><sub>Rk,sp</sub>=NPD  
  
**Kenmerkende weerstand tegen schuifbelasting (statische en quasi-statische belasting):**  
Weerstand tegen staalbreuk (afschuifbelasting): Bijlage C2  
Weerstand tegen uitbreken (pryout): Bijlage C2  
Weerstand tegen bezwijken van betonranden: Bijlage C2  
Verplaatsingen onder statische en quasi-statische belasting: Bijlage C4  
Duurzaamheid: Bijlages A2, B1  
  
**Kenmerkende weerstand en verplaatsingen voor de seismische prestatiecategorieën C1 en C2:**  
Weerstand tegen staalbreuk: NPD  
Weerstand tegen uittrekken: NPD  
Breukverlenging: NPD  
Factor ringvormige opening: NPD  
Verplaatsingen: NPD
- Veiligheid in geval van brand (BWR 2)**  
Reactie op brand: Klasse (A1)  
  
**Weerstand tegen vuur:**  
Weerstand bij brand, staalbreuk (trekbelasting): Bijlage C3  
Weerstand bij brand, uittrekken, (trekbelasting): Bijlage C3  
Weerstand bij brand, staalbreuk (afschuifbelasting): Bijlage C3
8. Geëigende technische documentatie en/of specifieke technische documentatie: -

De prestaties van het hierboven omschreven product zijn conform de aangegeven prestaties. Deze prestatieverklaring wordt in overeenstemming met Verordening (EU) nr. 305/2011 onder de exclusieve verantwoordelijkheid van de hierboven vermelde fabrikant verstrekt.

Ondertekend voor en namens de fabrikant door:

Dr.-Ing. Oliver Geibig, Directeur Business Units & Engineering  
Tumlingen, 2021-01-11

Jürgen Grün, Directeur Chemie & Kwaliteit

Deze DoP is opgesteld in meerdere talen. In het geval van geschillen over de interpretatie zal de Engelse tekst altijd prevaleren.

Het aanhangsel bevat vrijwillige en aanvullende informatie in het Engels die de (taal-neutraal gespecificeerde) wettelijke vereisten overschrijdt.

## Specific Part

### 1 Technical description of the product

The fischer Zykon-Hammerset anchor FZEA II is an anchor made of galvanised or stainless or high corrosion resistant steel which is placed in an undercut hole and anchored by mechanical interlock with displacement-controlled installation.

The product description is given in Annex A.

### 2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

### 3 Performance of the product and references to the methods used for its assessment

#### 3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic resistance for static and quasi static action	See Annex C 1 to C 2
Displacements	See Annex C 4

#### 3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for Class A1
Resistance to fire	See Annex C 3

#### 3.4 Safety in use (BWR 4)

The essential characteristics regarding Safety in use are included under the Basic Works Requirement Mechanical resistance and stability.

**4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

In accordance with guideline for European technical approval ETAG 001, April 2013 used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011 the applicable European legal act is: (96/582/EC)

The system to be applied is: 1

- ① Expansion sleeve
- ② Expansion pin
- ③ Plastic cap
- ④ Safety disk

- $h_{ef}$  = Effective anchorage depth
- $l_s$  = Screw-in depth
- $h_1$  = Drill hole depth
- $h_{min}$  = Minimum thickness of concrete member

Appendix 4 / 11

## Specifications of intended use

### Anchorage subject to:

- Static and quasi-static loads
- Fire exposure in concrete

### Base materials:

- Reinforced and unreinforced normal weight concrete according to EN 206-1:2000
- Strength classes C20/25 to C50/60 according to EN 206-1:2000
- Cracked or uncracked concrete

### Use conditions (Environmental conditions):

- Structures subject to dry internal conditions  
(Zinc plated steel, stainless steel, high corrosion-resistant steel) FZEA II, FZEA II A4, FZEA II C
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist  
(stainless steel, high corrosion-resistant steel) FZEA II A4, FZEA II C
- Structures subject to external atmospheric exposure and permanently damp internal condition, if other particular aggressive conditions exist  
(high corrosion-resistant steel) FZEA II C

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution  
(e.g. in desulphurization plants or road tunnels where deicing materials are used)

### Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Anchorages under static or quasi-static actions are designed in accordance with (please choose the relevant design method):
  - ETAG 001, Annex C, design method A, Edition August 2010 or
  - CEN/TS 1992-4:2009, design method A
- Fire **exposure** in cracked and uncracked concrete
  - Design according to TR 020 and ETAG 001, Annex C or CEN/TS 1992-4: 2009, Annex D

### Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Correct installation is ensured when front face of sleeve is approximately 1 mm below the concrete surface and the control mark on the sleeve is visible as illustrated in Annex B2

**fischer Zykon-Hammerset anchor FZEA II**

Edge distance	$C_{cr,N}$	2 x $h_{ef}$		
	$C_{min}$	40	45	50
	$C_{min}$	$C_{min} = 2 \times h_{ef}$ , for fire exposure from more than one side $c_{min} \geq 300$ mm		

### Installation instructions

No.	Description
1	Create a drill hole at right angles to the surface of the anchor base with a hammer drill, using the corresponding Zykon universal drill bit FZUB. The required drill depth is reached once the FZUB depth stop meets the concrete.
2	Once the FZUB depth stop meets the concrete, create the drill hole undercut by making circular swiveling movements with the hammer drill while the hammer mechanism is engaged. Press the hammer drill firmly against the anchor base: 2-3 swiveling movements are sufficient
3	Clean bore hole
4	Drive in the pin with the setting tool
5	Check of the setting notch for correct installation
