

# BASIC CONNECT

## 1000 lumen compact floodlight

F A T G

### Universal floodlight for all needs

This new work light is the obvious choice if you need a minor, basic, and universal floodlight that can be used every-where for all purposes. Like all other lamps in the CONNECT series, all battery brands can be used on the lamp using SCANGRIP CONNECTORS.

BASIC CONNECT provides as much as 1000 lumen and can be adjusted in 2 lighting settings, 50 % and 100 % depending on the actual job.

### Flexible, rotating lamp head

The design of BASIC CONNECT is very compact, and lightweight, only 340g without battery. BASIC CONNECT can be positioned on the surface where the battery base is acting as stand. Use the retractable metal hook for flexible suspension. The hook can be turned 360° for flexible positioning.

It is especially characteristic of the BASIC CONNECT that the lamp head has dual axis rotation. This means that the lamp head is 180° flexible from folded position. Furthermore, the lamp head can be rotated 180° sideways providing completely flexible positioning of the light.
